ALL NEW TITAN X MOTOR

Introducing the new Titan X motor from Blendtec - built to be quieter, run cooler, and with a longer life than any motor before it. Internal motor brushes have been replaced with electronics to increase the lifetime of the motor, give more output and torque to make drinks quicker, and use less power. The Dynamic Breaking system stops the blender jar blade instantly, allowing you to remove the blender jar quickly. Take advantage of less downtime by cutting out the need to replace machines and make more drinks without overheating - the blender even cools itself without running!

NBS RINGS

Every unit comes with four standard rings that fit 12 oz., 16 oz., 24 oz., and 32 oz. SOLO cups. Engineered to create a vacuum seal, each ring fits perfectly with its designated cup. Don't use SOLO cups for your business? No problem. The Blendtec team is standing by, ready to make custom rings that fit almost any plastic, paper or metal cup from 12-32oz.

**SOLO® is a trademark of the "SOLO Cup Operating Corporation"

CREATE A CONVERSATION-FRIENDLY ATMOSPHERE

The Stealth Nitro X includes a sleek sound enclosure and proprietary airflow innovations that enable operation at the sound level of a normal conversation.

JARLESS BLENDING, THE FOREFRONT OF INNOVATION

Why waste ingredients when you can have amazingly proportioned drinks and smoothies blended right in the cup you give your customer? The Nitro Blending System minimizes waste, saves time, and increases your profit margin. Each Stealth Nitro X

comes with two micronizers and two cup stands - two wingtip blade micronizers for pulverizing ingredients into silky-smooth single-serve drinks, or two frothing blade micronizers - perfect for whipping, frothing or emulsifying milks and creams for coffee and other beverages.

FROTHING MICRONIZER
